

**Subject: WAREHOUSE UNLOADING SPECIFICATIONS**

Dear Customer,

We hereby provide the material unloading specifications to comply with the load capacity of our unloading vehicles.

**Cardboard** core coils ALWAYS on a horizontal axis.

For coils with a maximum **width of 1280 mm** (ALUMINUM/STEEL):

- Side unloading with forklift: **maximum** pallet/saddle **weight 4500 kg\***
- Unloading into a pit with an overhead crane: **maximum weight 9000 kg** (Steel)\*

For coils with a maximum width of 1500 mm (ALUMINUM and STEEL):

- Side unloading with forklift: maximum pallet/saddle weight 4500 kg\*
- (\*position the coils appropriately spaced to allow the overhead crane to be accessible)

**Maximum** external diameter: **1400 mm** (for both Aluminum and Steel).

Internal diameter (core): 500 mm

Do NOT use paper interlayers

Do NOT use adhesive tape

Please ALWAYS provide adequate notice of the date of receipt of the material so that we can alert our warehouse.

Please note our warehouse hours: Mon-Fri 8:15 AM – 11:30 AM; 1:00 PM – 4:30 PM.

**Material that does not meet these requirements will not be unloaded by our operators.**
